(c) Segment reporting

The Company's operating businesses are organized and managed according to the nature of the products and services that are being marketed. Each segment represents a strategic business unit that offers different products and serves different markets. The Company has operations only in the Philippines.

The Company derives revenues from two (2) main segments as follows:

(i) Sale of solar energy

This business segment pertains to the generation of electricity from solar power energy through its Clark Solar Power Project. National Transmission Corporation (TransCo) is the Company's sole customer for its sale of solar energy. As a result of assignment of SESC of the Clark Solar Plant to its Parent Company, the sale of solar energy business was terminated with the approval of the DOE on December 24, 2021 effective December 25, 2021. The assignment entailed the transfer of rights as a service contractor with the Philippine government but did not convey ownership over the assets. This was a change in the revenue model using the same solar plant and equipment. The Company still generates cash flows from these assets in the form of lease income instead of sale of solar energy before the assignment. Notwithstanding the change in revenue model, the cash-generating unit remains intact and owned by the Company.

(ii) Leasing

This business segment pertains to the rental operations of the Company with related parties which commenced in November 2021 (Note 13).

All amounts reported in the financial statements of the Company as at March 31, 2025 and December 31, 2024, and for the three months ended March 31, 2025 and 2024 are attributable to this segment except for trade receivables from TransCo amounting to P58.55 million (December 31, 2024 – P62.78 million) and interest income arising from amortization of discount on trade receivables amounting to P0.64 million (2024 – P0.83 million) (Note 4), which are attributable to sale of solar energy segment.

The results of operations of the reportable segments of the Company for the periods ended March 31 are as follows:

Note 2 - Additional notes in compliance with Philippines Accounting Standard (PAS) 34

1. There are no seasonal aspects that have a material effect on the condensed interim financial statements. The Company’s revenues (including rental income from investment properties) are correlated to the amount of electricity generated by its solar power plant and the solar power plants operating on the investment properties, which in turn is dependent upon irradiance and weather conditions. Irradiance and weather conditions have natural variations from season to season and from year-to-year and may also change permanently because of climate change or other factors. The Company believes that such seasonality is effectively managed as the Company and its lessees have installed systems to monitor the daily output of such solar power plants and calibrate and improve output, as the need arises, based on an expected performance ratio.
2. Related party transactions include advances to (from) related parties which are made to finance working capital requirements including lease and sublease agreements, security deposits, purchase of land properties and payment of property management fee and fund management fee (Note 11).
3. Refer to Note 13 for the disaggregation of the Company’s revenue from contracts with customers recognized for the period ended March 31, 2025 and 2024.
4. The Company’s equity transactions for the period ended March 31, 2025 include dividend declaration amounting to P358 million (Note 12).
5. There were no items not in the ordinary course of business for the period ended March 31, 2025 that affected assets, liabilities, equity, net income, or cash flows that are unusual because of their nature, size, or incidence.
6. There were no changes in management’s use of estimates, assumptions and judgments that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities.
7. There were no other off-balance sheet arrangements or obligations for the period ended March 31, 2025 that were likely to have a current or future effect on the financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.
8. There are no significant elements of income or loss for the period ended March 31, 2025 that did not arise from the Company’s continuing operations.

9. Any material changes from period to period in any line items of the Company's condensed interim financial statements that have not been explained were the results of normal fluctuations in operations.

Interest rate is the rate prevailing for a 91-day treasury bill plus 3%. There are no interest income arising from late payments of TransCo for the three months ended March 31, 2025 and 2024.

Discount on trade receivables from TransCo arising from this amounted to P2.37 million as at March 31, 2025 (December 31, 2024 – P2.62 million). Interest income arising from amortization of discount on trade receivables from TransCo for three months ended March 31, 2025 and 2024 amounted to P0.64 million (2024 – P0.83 million) (Note 18).

Lease receivables pertain to accrued rent resulting from the straight-line method of recognizing rental income.

Other receivable pertains to a refund for overpaid insurance.

The Company does not hold any collateral as security. Management believes that an allowance for doubtful accounts as at March 31, 2025 and December 31, 2024, except for other receivable which has been fully provided for, is not necessary since these account balances are deemed fully collectible. Trade receivables are all current in nature except from non-current portion of receivable from TransCo related to FIT-rate adjustments. All previous billings of the Company were collected in full.

None of the trade and other receivables that are fully performing have been renegotiated.

(a) Freehold land asset

On May 25, 2021, the Company and Parent Company, executed a deed of assignment whereas the latter hereby assigns, transfers, and conveys a parcel of land located in Brgy. Armenia, Tarlac City, Tarlac to the former, absolutely, and free from all liens and/or encumbrances, valued at P4.87 million in consideration for the issuance of Company's shares upon approval of the SEC of the Company's application for the increase in authorized share capital. On the same date, the Company and CST1 executed a deed of assignment whereas the latter hereby assigns, transfers, and conveys several parcels of land located in Brgy. Armenia, Tarlac City, Tarlac to the former, absolutely, and free from all liens and/or encumbrances valued at P229.68 million in consideration for the issuance of Company's shares upon approval of the SEC of the Company's application for the increase in authorized share capital (Note 14). These parcels of land are recognized with reference to its fair value. The approval of the increase in the authorized share capital was obtained from the SEC on October 12, 2021. The actual transfer and registration of the parcels of land to the Company's name were finalized on October 27, 2021.

In 2022, the Company executed a deed of absolute sale with Citicore Solar Bulacan, Inc. (CSBI) (formerly Bulacan Solar Energy Corporation) and Citicore Solar South Cotabato, Inc. (CSSCI) (formerly nv vogt Philippine Solar Energy One, Inc.), entities under common control, for the purchase of several parcels of land located in San Ildefonso, Bulacan and Brgy. Centrala, Suralla, South Cotabato for a total consideration of P1.75 billion and P753.80 million, respectively (Note 11).

The proceeds from the P4.5 billion bonds which the Company raised in February 2023 (Note 11) were used to acquire parcels of land from multiple land-owners spread across the three barangays in Tuy, Batangas, namely: Brgy. Lumbangan, Brgy. Luntal, and Brgy. Bolbok. Additional acquisitions were also made in Arayat, Pampanga, Mexico, Pampanga and Pangasinan. These parcels of land are ideal for utility scale solar power plants due to proximity to the National Grid Corporation of the Philippines (NGCP) substation and proven solar irradiance resources. The cost of acquisition, taxes and other land related expenses were capitalized as part of investment properties. These parcels of land were subsequently leased out to its related parties (Note 12).

The aggregate fair value of these parcels of land as determined by an independent appraiser as at March 31, 2025 amounted to P10.23 billion. The fair value of the parcels of land was estimated by the independent appraiser using the discounted cash flow analysis grounded on the principle that the value of an economic entity is the present worth of the economic benefits it will generate in the future (i.e., economic benefits come in the form of lease of the solar power plant). This approach requires a forecast of the economic entity's stream of net income based on lease contract. These net income or rents are then summed up and discounted back to present value by an appropriate discount rate, then add the terminal value of the property. The valuation process consists of estimation of the current market value of the leased property and present value of the unexpired contract rentals. The discounted cash flow analysis falls under the income approach which is a method in which the appraiser derives an indication of value for income-producing property by converting anticipated future benefits into current property value. This approach falls under Level 3 of the fair value hierarchy. As required by the REIT Implementing Rules and Regulations (REIT IRR), a full valuation of the Company's assets shall be conducted by an independent property valuer at least once a year. Management assessed that there are no significant changes in the business environment from the date of last valuation up to reporting date which would impact the fair value of the properties.

The fair value is sensitive to the following unobservable inputs: (1) lease income growth rates (fixed and variable lease) which were based on the signed lease contracts and (2) discount rate using the weighted average cost of capital based on the average capital structure of the companies in the solar energy sector as of the valuation date.

The current use of the parcels of land is at its highest and best use.

(b) Leasehold land assets

The Company, as a lessee, entered on the following lease agreements:

- On July 26, 2021, the Company entered into a contract of sublease and contract of lease with the owners of parcels of land with a total aggregate area of approximately 4.8 hectares and 5.6 hectares, respectively, which are located in Brgy. Dalayap, Tarlac City, Tarlac. Each of these land properties are covered by an existing lease contract with an original term from November 1, 2015 to October 31, 2040 with Citicore Solar Tarlac 2, Inc. (CST2) (formerly nv vogt Philippines Solar Energy Four, Inc.), an entity under common control. The Company subleased the land back to CST2 effective November 1, 2021 (Note 11). These lease agreements are effective for 19 years commencing on November 1, 2021 until October 31, 2040 which may be extended at the option of the Company for another 25 years upon the acceptance by and consent of the lessor.
- On July 26, 2021, the Company entered into a deed of assignment with Citicore Solar Cebu, Inc. (CSCI) (formerly First Toledo Solar Energy Corp.) (assignor), an entity under common control, and a third-party lessor, to transfer, assign, and convey unto the Company (assignee) all of the assignor's rights and obligations under the contract of lease dated November 12, 2015 for the lease of parcel of land with total aggregated area of approximately 73 hectares located in Brgy. Talavera, Toledo City, Cebu. The third-party lessor consented to the assignment of the contract of lease in favor of the Company and the sublease of the leased area by the Company in favor of the assignor. CSCI operates a 60 MW installed capacity solar power plant in the leased area that was successfully commissioned on June 30, 2016. The Company shall pay an advance rental every two years, subject to escalation rate of 12% every five years, for a period of 25 years, reckoned from the effective date stipulated in the Renewable Energy Payment Agreement but not later than May 31, 2016, subject to renewal. The agreement took effect on January 1, 2022. On July 26, 2021, the Company entered into sublease agreement with CSCI (sublessee) related to the identified leased area effective January 1, 2022 (Note 11).
- On July 28, 2021, the Company entered into a lease agreement with an owner of several parcels of land located in Brgy. Rizal, Silay City, Negros Occidental. These land properties are covered by an existing lease contract that commenced on June 1, 2016 with Citicore Solar Negros Occidental, Inc. (CSNO) (formerly Silay Solar Power, Inc.), an entity under common control. The Company subleased the land back to CSNO. Note 20 - Fair value estimation and financial risk and capital management

20.1 Fair value estimation

The carrying values of the financial instrument components of cash and cash equivalents, trade and other receivables, trade payables and other liabilities (excluding due to government agencies), due to related parties, and lease liabilities approximate their fair values, due to the liquidity, short-term maturities and nature of such items. The fair values of other non-current assets, non-current portion of trade receivables, security deposits and non-current portion of lease liabilities are close to market rates. The carrying value of the Company's financial instruments are summarized in Note 21.2.1.

As at March 31, 2025 and 2024, the Company does not have financial instruments that are measured using the fair value hierarchy.

20.2 Financial risk management

The Company's activities expose it to a variety of financial risks from its use of financial instruments: market risk, credit risk, and liquidity risk. The Company's overall risk management program seeks to minimize potential adverse effects on the financial performance of the Company.

The BOD has overall responsibility for the establishment and oversight of the Company's risk management framework. It monitors compliance with the risk management policies and procedures and

reviews the adequacy of the risk management framework in relation to the risks faced by the Company. Risk management policies and systems are reviewed regularly to reflect changes in market conditions.

20.2.2 Market risk

Market risk is the risk that changes in market prices, such as interest rates, security price and foreign exchange rates, will affect the Company's total comprehensive income or the value of its financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing return. Security price is deemed not applicable since the Company has no debt or equity instruments traded in an active market. The management of these risks is discussed as follows:

(a) Interest rate risk

Interest rate risk arises from the possibility that changes in interest rates would unfavorably affect future cash flows from financial instruments. The Company's exposure to risk for changes in market interest rates relates to loans payable, cash in banks, short-term placements, and lease liabilities.

The Company's exposure to risk for changes in market interest rates primarily relates to loans payable with fixed interest rate which was assumed by the Parent Company effective May 4, 2021. Management believes that the related interest rate risk on this instrument is relatively insignificant having fixed interest rate. The Company has no outstanding loans payable as at March 31, 2025 and December 31, 2023 (Note 11).

Management believes that the related cash flow and interest rate risk on cash in banks and short-term placements is relatively low due to immaterial changes on interest rates within the duration of these financial instruments. There are no other financial instruments subject to interest rate risk.

(b) Foreign exchange risk

The Company is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to U.S. Dollar. Foreign exchange risk arises when future commercial transactions, and recognized assets and liabilities are denominated in a currency that is not the Company's functional currency. Among others, management monitors the timing of settlements/payments to ensure that the Company is not unfavorably exposed to fluctuations of foreign exchange rates.

The Company's foreign currency denominated monetary liability as at March 31, 2025 refers to a portion of lease liabilities amounting to US\$18,969 (December 31, 2024 - US\$19,102) with Philippine Peso equivalent of P1.10 million (December 31, 2024 - P1.11 million).

Details of foreign exchange losses, net for the periods ended March 31 are as follows:

	Notes	2025	2024
Unrealized losses (gains), net	18	(4,354)	-
Realized losses, net		-	13,906
		(4,354)	13,906

The Company's exposure to foreign currency risk is not significant due to the absence of material transactions and balances denominated in a currency other than the Company's functional currency.

20.2.3 Credit risk

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in a financial loss to the Company. The Company's credit risk arises primarily from its cash and cash equivalents, trade and other receivables, electric utility deposits, security deposits and restricted cash. Exposure to credit risk arises from potential default of the counterparty, with a maximum exposure equal to the carrying amounts of these financial assets. The Company uses internal ratings to determine the quality of its financial assets. The Company determined that its financial assets are all considered high grade financial assets except for those that were fully provided for.

The maximum exposures to credit risk are equal to the carrying amount of the cash and cash equivalents (excluding cash on hand), trade and other receivables, cash bond, and security deposits as at March 31, 2025 and December 31, 2024 as disclosed in Note 21.2.1.

Credit quality of financial assets

(i) Cash and cash equivalents and restricted cash in bank

Cash deposited/placed in banks are considered stable as the banks qualify as universal and commercial banks as defined by the Philippine Banking System and are approved by the BOD to minimize credit risk. The amounts deposited in these banks are disclosed in Notes 4 and 8. The expected credit loss is determined to be immaterial. Cash on hand is not subject to credit risk.

(ii) Trade and other receivables

The Company has significant concentration of credit risk for the sale of energy segment business on its transactions with TransCo, its sole customer. However, this is brought down to an acceptable level since credit terms on billed fees for sale of electricity are fixed as provided in formal agreements, and are accordingly collected in accordance with this agreement and the Company's credit policy with no reported defaults and write-offs in previous years. The expected credit loss is determined to be

immaterial by management.

Trade receivables from leasing segment include receivables from related parties. The credit exposure on trade receivables from related parties is considered to be minimal as there is no history of default and collections are expected to be made based on the lease agreement. In addition, the related parties are considered to have good financial standing and are highly liquid. The expected credit loss is determined to be immaterial by management.

The credit exposure on due from related parties is considered to be minimal as there is no history of default and collections are expected to be made within 12 months. The balances of due from related parties are considered as high-grade financial assets as the related parties have good financial standing and are highly liquid. The expected credit loss is determined to be immaterial by management.

Other receivables pertain to refund for overpaid insurance which has been long outstanding for more than one (1) year. Full provision has been recognized for this receivable as at March 31, 2025 and 2024.

(iii) Security deposits and cash bond

Security deposits include cash required from the Company in relation to its lease agreement. On the other hand, cash bonds comprise of cash required from the Company for the land conversion required by DAR of the properties acquired and owned from agricultural to industrial use. These deposits are assessed as high grade as there was no history of default and these are collectible upon termination of or at the end of the term of the agreements. The expected credit loss is determined to be immaterial by management.
